 43. A. am doing B. will do C. do D. will have done
 44. A. am taking B. have taken C. had taken D. have been taking

III. Reading comprehension: 12%

Great advances in communication can be basically categorized into two areas of advancement: the ability to replicate messages many times over, and the ability to send these messages over great distances. Though since the 15th century, printers such as Johann Gutenberg in Germany were utilizing movable type and the hand press, until the 19th century, the problem of distance had only been **attacked** by the invention of faster and more effective means of transportation, such as James Watt's invention of steam engine in 1819.

In 1837, however, Samuel Morse patented the telegraph, which utilized coded electric impulse to send signals through wires. With the aid of the U.S. Government, wires connecting Washington, D.C. and Baltimore were built, and Morse relayed the famous message which well expresses the ramifications of his invention: "What hath God wrought." Shortly after, in 1876, while attempting to improve the telegraph system, Alexander Graham Bell stumbled upon a method to convert human speech into electric current and back again, thus giving rise to telephone. With these two inventions, messages could be relayed over large distances within a short amount of time, prompting the American Telephone and Telegraph Company to connect New York and Chicago by wire in 1892. The world of communication, and the world itself, was thus forever changed.

45. What is the main topic of this passage?
 A. the invention of telegraph

- B. problems with communication
 - C. inventions which allow messages to be relayed over long distances
 - D. Samuel Morse's life and work
46. According to the passage, when was telephone invented?
- A. 1819 B. 1837 C. 1876 D. 1892
47. Which of the following is mentioned by the author as a person who is associated with the mass production aspect of communication?
- A. Johann Guttenberg B. James Watt C. Samuel Morse D. Alexander Graham Bell
48. The word "attacked" in line 5 would be best replaced by which of the following?
- A. solved B. approached C. worsened D. fought
49. Samuel Morse's first telegraph message refers to which of the following?
- A. the inability of humans to relay messages over large distances
 - B. the inspiration which helped Morse invent the telegraph
 - C. the inevitability of the telegraph following his invention
 - D. the tremendous implications of his invention
50. The paragraph following this passage would most likely discuss
- A. Alexander Graham Bell's other inventions
 - B. The history of the American Telephone and Telegraph company
 - C. Inventions such as movable type, which allowed messages to be replicated many times
 - D. Further growth in communication resulting from the inventions of the telegraph and telephone
